Education

University at Buffalo

Buffalo, NY

Bachelor of Science in Computer Engineering, Honors College Scholar

Expected May 2028

• Relevant Coursework: Intro to Computer Science II (CSE 116), Intro to Discrete Structures (CSE 191)

Experience

Audio Plugin Developer

April 2023 - Present

NEST Acoustics

- Engineering VST audio plugin software using HISE/JUCE for a virtual instrument company, enabling users to play and manipulate audio samples.
- Collaborated with the founder to define product specifications and user interface requirements.

Research Intern - Al/Machine Learning

May 2024 - October 2024

Rochester Institute of Technology

Rochester, NY

- Worked under the guidance of Professor Haibo Yang to explore federated learning networks and practical Al applications.
- Developed an in-browser AI image classifier using TensorFlow.js, leveraging a MobileNetV3 base model with a custom head trained on the Caltech 256 dataset.
- Engineered the user interface with React and Tailwind CSS, utilizing the Filepond library for robust image input.

Swim Instructor/Lifeguard

March 2024 - June 2025

YMCA of Rochester

Pittsford, NY

• Ensured safety for dozens of swimmers in a high-traffic pool environment while instructing children in fundamental and competitive swimming techniques.

Projects

Library Management System | PHP, JavaScript, MySQL, HTML, CSS

September 2023 - May 2024

- Designed and developed a full-stack web application to replace an inefficient pen-and-paper system for the Hindu Temple of Rochester's library.
- Implemented a database to manage book records and track loans, reducing administrative overhead for volunteers.
- Created a user-friendly interface for patrons to browse and check out books, improving the user experience.

Droppua | JavaScript, PHP, Docker, MySQL

June 2024 - July 2024

- Engineered a real-time web application for seamless text and file sharing across devices without page reloads.
- Utilized Server-Sent Events (SSE) with a PHP backend to efficiently stream data from a MySQL database to the client.
- Designed an intuitive user interface and developed an iOS Shortcut integration to maximize ease of use.

Non-Profit Website | WordPress

July 2023 - September 2023

• Developed and deployed a public-facing WordPress site for GramNY, a local nonprofit, to enhance their online presence and attract new members.

Technical Skills

Languages: Java, Python, C++, PHP, SQL, JavaScript, HTML/CSS

Technologies & Frameworks: React, Node.js, TensorFlow.js, JUCE, WordPress, Git, Docker, OCI, GCP
